

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-4. (Canceled)

5. (Currently Amended) Internet and TV data service browsing apparatus configured to display Internet pages retrieved from the Internet in response to a Internet address being inputted by a user and to display TV data service data retrieved from a TV channel broadcast in response to a TV data service address being inputted by a user, ~~characterized by saving means for saving~~ including a file saving system that saves a TV data service data file in a file format which is viewable by the browser, which is composed of, contains or refers to the TV data service data, and which is saved either having a file name or having a directory structure indicating either the channel name or channel number of the TV channel, wherein the saved TV data service data file can be browsed through via the browser.

6. (Original) Apparatus according to claim 5 wherein, upon retrieving TV data service data in a file format which is viewable by the browser, the saving means saves this file as the TV data service data file.

7. (Previously Presented) Apparatus according to claim 5 wherein, upon retrieving TV data service data in a file format which is not viewable by the browser, the saving means first converts that file to a format which is viewable by the browser and then saves that converted file as the TV data service data file.

8. (Original) Apparatus according to claims 5 wherein, upon retrieving TV data service data either in a file format which is not viewable by the browser or not in a file format, the saving means first creates or amends a file to containing either TV data service data retrieved from the TV channel or a reference to an associated file containing TV data service data retrieved from the TV channel, and then saves that created or amended file as the TV data service data file.

9. (Currently Amended) A method of providing browsing of Internet and TV data services comprising the steps of:

- supporting a browser;
- retrieving TV data service data from a TV channel; and
- saving a TV data service data file which is composed of, contains or refers to the TV data service data in a file format which is viewable by the browser and with either a

file name or directory structure indicating either the channel name or channel number of the TV channel,

wherein the saved TV data service data file can be browsed through via the browser.

10. (Original) A method according to claim 9 wherein upon retrieving TV data service data in a file format which is viewable by the browser, that file is saved as the TV data service data file.

11. (Previously Presented) A method according to claim 9 wherein, upon retrieving TV data service data in a file format which is not viewable by the browser, that file is first converted to a format which is viewable by the browser and then that converted file is saved as the TV data service data file.

12. (Previously Presented) A method according to claim 9 wherein, upon retrieving TV data service data either in a file format which is not viewable by the browser or not in a file format, a file is first created or amended to contain either TV data service data retrieved from the TV channel or a reference to an associated file containing TV data service data retrieved from the TV channel, and that created or amended file saved as the TV data service data file.
